Overview

Copy Web Client Files to your Web Server Directory

At this point in the installation we need to copy the i2b2 Web Client directory from *YOUR_I2B2_WC_DIR* to your web server directory.

Steps to copy files

1. Go to the location of ***YOUR_I2B2_WC_DIR***.
2. Locate the folder called **webclient**.
3. Copy the entire **webclient folder** to your ***web server directory***.

Linux: On a Linux server you want to copy it to your *httpd directory*.

Example: /var/www/html

Windows: On windows server you want to copy it to your *wwwroot directory* which is in your inetpub folder.

Example: C:\inetpub\wwwroot
