2.5.3.1 PHP for Linux

According to the PHP Website:

"*We do not distribute binaries for UNIX/Linux binaries. Most Linux distributions come with PHP these days, so if you do not want to compile your own, go to your distribution's download site.*"

They did provide a list of binaries available on external servers for many different versions of Linux and MacOS. To see a list of these external servers you can go to the following page on the php website:

http://php.net/downloads.php

For documentation on configuring PHP for cURL you can visit the following page on the php website:

http://www.php.net/manual/en/book.curl.php
