3.4.3 Create Crcdata Tables

Step 3: Create Data Repository (CRC) Tables

The **third step** in the Crcdata installation process is to create the Crcdata tables, indexes and sequences by running the following command:

Select the command line that is appropriate for your environment.

Linux Run Command
ant -f data_build.xml create_crcdata_tables_release_1-7

Windows Run Command
%ANT_HOME%\bin\ant.bat -f data_build.xml create_crcdata_tables_release_1-7

Note

If the command %ANT_HOME% does not work it may be because you did not set your environment variables as suggested in the Requirements Chapter. If you do not wish to set this variable then you will need to replace %ANT_HOME% with the full path to your Ant directory.
