Overview

6.3.1 Hive Data · https://i2b2.org/docs/6-3-1-hive-data/

The **Hive Data** page captures the following general information about a hive.

Field	Description	Required
Domain Id	• A unique id for the domain in which this hive resides. • This ID is encrypted when it is saved and stored in the database.	Yes
Help URL	• A link to an external website that may contain additional information on using the i2b2 in your environment. • This link is only used in the i2b2 Workbench and is not available from within the i2b2 Webclient. *(in the workbench heading there is a button labeled **i2b2**; clicking on this button will launch the website entered at this field.)*	No
Domain Name	• The name of the domain in which this hive resides. • This is the same name that is entered in your Web Client and Admin config files as well as the Workbench properties file.	Yes

Environment	• The type of environment this hive resides. The options are:
	  ◦ Development
	  ◦ Production
	  ◦ Test
		Yes

Note

The hive is created when you are installing the i2b2 server. You cannot add or remove a hive from within i2b2 Admin; however you can edit the hive's data.
